

VISION STATEMENT

Our vision is to help each one of our students make their life a success.

For this to happen our students need to develop academically, socially and emotionally in many different ways that can be encapsulated in three key words:

- Gusto

Approaching life and learning with energy and enthusiasm, being curious to find out more and displaying genuine eloquence, zest and vitality.

- Grit

Having goals and working to achieve them, overcoming obstacles, meeting challenges and maintaining focus. Demonstrating resilience, discipline and self-control that are recognised as essential characteristics for success in later life.

- Growth

Developing the belief that we can all improve and learn throughout our lives via hard work, effort and honing both our social and emotional skills. Taking pride in our ever growing expertise and professionalism, remaining optimistic and showing gratitude for our opportunities and the support of those around us..

We develop these vital elements through our curriculum, our pastoral care, our extra-curricular programme and our focus on the core character skills that are required in the modern world.

**We are not the end goal for our students.
We are merely a stepping stone.
We must aim to be the best possible stepping stone.**
